BENDING OPTIONS OFFERED BY TEXTILE TRIMMINGS

Angle Bends

Applications: Bay, Bow windows, corner window treatments, partition tracks, healthcare cubicle tracks, or French return.

Continuous Bends

Applications: Curved glass walls, panoramic windows, or open-plan spaces needing fluid track movement.

Arch Bends

Applications: Arched windows, theater stages, movie sets, decorative window treatments, or heritage buildings with rounded frames.

MOTORIZATION

The integration of motorization, primarily provides enhanced comfort and functionality, including ultra-silent operation, touch control technology, programmable stack-back positions, and seamless integration with various home automation systems like Google Home, Amazon Alexa, and Apple Siri.

Our motorized drapery systems are designed to operate smoothly even when spliced, maintaining consistent glide and uniform appearance.

FRENCH RETURN

French Returns Now Available on Selected Rods and Tracks.

French return curtain rods are designed with curved ends that loop back to the wall, eliminating the need for decorative finials. This style provides a clean appearance, allows the drapes to wrap around the side, and improves light control by reducing gaps along the edges of the curtains.

Bracket Spacing:

- Decorative Round Rods (wall mount): 72"
- Channel Rods:
 - Wall mount: 32"
 - Ceiling mount: 24"

At Textile Trimmings, we are consistently innovating. We can now angle bend our systems with a smaller radius, allowing for a tighter curve.
